WORLD HAPPENINGS BRIEFLY TOLD

Air mail can now be sent from London to Jamaica, by way of Miami to Kingston, in 11 to 12 days.

No serious obstacle will be raised by the Alberta government in connection with a proposed \$100,000,000 power scheme to use waste gas.

Hon. Herbert Marler, Canadian minister to Japan, will arrive in Vancouver on May 14, and will leave for Ottawa May 16.

The International Hydro-Generator Patents Company Limited, a world-wide organization, has been formed to develop fuel oil from coal.

A silver porringer, which was worth approximately \$90 when Samuel Pepys, the famous diarist, used it, was auctioned for approximately \$7,500.

More than 8,000 workmen of the naval dockyards and arsenals were discharged as a consequence of restriction of activities under the London naval treaty.

Five nations—Canada, the United States, Russia, Argentina and Australia—hold the power to remedy agrarian economic ills, Louis Fischer says in his new book, "Why Recognize Russia?"

A Baghdad despatch to the newspaper "Times of India" said that thousands of tribesmen and their cattle are dying of thirst and starvation in the worst drought in the history of the southern Iraq Desert.

Admiral Richard E. Byrd, the first man to fly over the North and South Poles, states that he is planning another aeroplane expedition "into the polar regions" in the next few months. He would not reveal whether he would fly to the Arctic or Antarctic regions.

Passing Of a Veteran

104 Years Old Soldier Fought Under Flag of Five Nations

A 104-year-old soldier, who fought under the flag of five nations, died recently in Detroit. He was captain Arthur Walpole Rowland.

Captain Rowland was born in India, son of a British army officer, and was educated in Edinburgh. He was an army engineer and served for more than the normal span of years as a soldier. He was said to be the last survivor of the famous "Charge of the Light Brigade." He fought in India, under "Chinese" Gordon; in China, with the federal forces; in the American civil war, and with the Bonapartists in Vera Cruz.

Unable to get into the Spanish-American war because of age, Captain Rowland lived to become an inspector of supplies at Pittsburgh during the Great War. He became a citizen of the United States in 1923.

An adventure of Captain Rowland late in life occurred in the Gold Rock country of Canada, 20 years ago, when he was lost from his party and wandered about for a month before he was found by a geological survey group.

New Hazard For Aviators

Add the mouse to hazards of aviation. A large section of wing fabric pulled loose from his plane, while Oscar Dawson was making a flight at Raleigh, North Carolina. He landed safely. Workmen ripped the wing open and found a mouse huddled in a nest of threads gnawed from the fabric.

HEADACHES

Needless pains like headaches are quickly relieved by Aspirin tablets, as millions of people know. And no matter how suddenly a headache may come upon you, you can always be prepared. Carry the pocket tin of Aspirin tablets with you. Keep the larger size at home. Read the proven directions for pain, headaches, neuralgia, etc.

DEMURE LITTLE MISS APPEARS IN PRINT

Today's bolero model is youthful in style and colouring. It's fascinating in soft yellow and blue challis-like woolen, so lovely for Springtime without a topcoat. The collar of course, like all the French models, is of white pique. It is hemstitched professionally, separating the scallops to give a petal-like effect.

And to add to its attractiveness, it is accompanied by matching bloomers with knee bands.

Style No. 200 is designed for girls of 8, 8, 10, 12 and 14 years. Crepe de chine prints, tweed-like cottons, wool crepe, wool jersey, rayon novelties and linen are also perfect mediums for this adorable dress.

It is easily fashioned! The small expenditure will surprise you! Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Recipes For This Week

(By Betty Barclay)

SUGAR COOKIES

2 1/2 cups special flour, sifted.
2 teaspoons baking powder.
1/2 teaspoon nutmeg.
1/2 cup butter or other shortening.
1 cup sugar.
2 eggs, well beaten.
Grated rind 1 lemon.
1 tablespoon cream.

Sift flour once, measure, add baking powder and nutmeg, and sift together twice. Cream butter thoroughly, add sugar gradually, and cream together until light and fluffy. Add eggs, lemon rind, and cream, and beat well. Add flour, a small amount at a time. Beat after each addition until smooth. Roll into thin sheet on slightly floured board. Cut with floured cookie cutter and dredge with sugar. Bake in hot oven (425 degrees Fahrenheit) about 7 minutes. Makes 2 1/2 dozen cookies.

CELERY SAUCE

Cook 1/2 cup chopped celery in 1 1/2 cups salted boiling water 20 minutes. Drain, reserving both liquid and celery. Melt 1 1/2 tablespoons butter, add 1 1/2 tablespoons flour, and when smooth add the reserved celery liquid with enough more water to make 1 cup. Stir and boil 1 minute. Add the celery, bring to boiling point, season to taste with paprika and more salt, if necessary, and keep over hot water until ready to serve. Just before serving, add 1 egg yolk and 1/2 cup cream, stir and cook 2 minutes.

"Women," said little Harold, "are always doing something to break a feller's heart."
"Yes," said little Jerry, "my sister's beau just started giving me small change every Sunday, and then she married him."

PILES
PAIN STOPS LIKE A FLASH!
"I had piles for months. Nothing helped me until I tried 'Scott's Emulsion'. The drug application ended itch and pain. Piles gone."
—S. C. Arler, End pain quick. All druggists.

Redistribution In Manitoba

Committee Will Bring In Report At Next Session

Redistribution of constituencies in Manitoba will be undertaken by a special committee to be appointed by the government, Hon. R. A. Hoey, Minister of Education, told the legislature.

The committee will sit during the recess and bring in its report at the next session, the minister said. "I do not know if it is the intention of the government to have a majority on that committee and I do not think it matters," he added. Mr. Hoey thought the question required thorough discussion and the House would be given an opportunity of giving certain instructions to the committee.

In asking the government for a statement, J. T. Haig, Winnipeg Conservative member wanted to know if it was the intention to cut down the number of seats to 45. He thought if a reduction to this extent was made, Winnipeg should have 15 of them. Present membership in the House is 55, ten from Winnipeg.

Mr. Hoey, in his reply, made no mention of the government's policy regarding redistribution other than announcing a committee would be named.

Big Power Project

Plan To Use All the Turner Valley Surplus Gas

If approval is given by Premier Brownlee to an immense power project in Southern Alberta by the Hercules Consolidated Mining and Smelting Company, whereby all the waste gas from Turner Valley would be utilized for the generation of power, a plant will be commenced within 90 days after the granting of approval and 70,000 more horse-power will be generated within a year, according to R. Crowe-Swords, representative of the Hercules Company, in a statement made in Calgary.

"We plan, at the outset, to spend not less than \$10,000,000 and ultimately, to spend approximately \$100,000,000 on this project," Mr. Crowe-Swords stated. "The company is abundantly financed by European capital."

The plan, as outlined by Mr. Crowe-Swords, is to force all the concentrated waste gas in Turner Valley into one pipeline. The gas, under the tremendous pressure, would be forced against a specially designed wheel. Released, the gas would then be carried on to another station. For the generation of power, the gas could be used over and over again, Mr. Crowe-Swords said.

Ontario's Sea Port

Railway Will Reach Moose Factory In August Of This Year

Ontario's first and only seaport will become a reality in August this year, when the Temiskaming and Northern Ontario Railway reaches the James Bay at Moose Factory. At that time this 200-year-old habitation will be brought into the modern and civilized class and a commencement made at establishing what is expected to be an important industrial centre.

With advent of the railway the T.N.O. commission will immediately start building a new town and establishing the facilities that will be required for terminal purposes. The main building programme other than for structure that will be required by the railway, will not be instituted for a year.

Cannot Limit Wheat Acreage Agreement with Hon. G. Howard Ferguson, Canadian High Commissioner to Great Britain, that limitation of wheat production in Canada is not practicable, was expressed at Ottawa by Robert Gardiner, member for Acadia, and leader of the United Farmers of Alberta group in the House of Commons.

Some kinds of bacteria split, thereby producing more bacteria, every thirty minutes.

Canadian Radio League

Support For Proposal To Form Two Railway Broadcasting Systems

Declaring that the British Broadcasting Corporation was established to give the British Government control of a war propaganda machine, and strongly opposing a national broadcasting system, J. Murray Gibbon, of the C.P.R., Montreal, has announced in an article published in the Canadian Forum of Toronto, support of the proposal to form two railway broadcasting systems. Mr. Gibbon is general publicity agent of the C.P.R., under whom C.P.R. broadcasting is administered.

Mr. Gibbon endorses the proposal of R. W. Ashcroft, of the Gooderham and Worts Station, Toronto, that the C.P.R. and C.N.R. each have a system. "It is the most practical proposal so far suggested," he states. The private system would carry advertising and would not require a government subsidy. The public system, he proposes, would carry the educational programmes and it is his opinion that it would only interest ten per cent. of the listeners. Mr. Gibbon is convinced that it would certainly need a subsidy at the expense of the tax-payers.

There is a superfluity of small private stations, says Mr. Gibbon, and he advocates a re-allotment of wavelengths between the two railway networks. The small stations split up wave-lengths and have permitted of offensive direct advertising, but "to eliminate advertising from the air would deprive more than half the population of what they want, to provide intellectual solace for a few," he stated.

According to published B.B.C. programmes, Mr. Gibbon says advertising is broadcast in Britain and the contention of the Canadian Radio League that no advertising is carried is not borne out. The increase in the number of British listeners he says, is not due entirely to the popularity of B.B.C. programmes, but to the knowledge that an up-to-date set provides reception for continental programmes.

Mr. Gibbon examines the financing of broadcasting in North America, and says that Canadians get \$20,000,000 worth of entertainment from American stations, and \$2,000,000 worth from Canadian. A generous estimate of the cost of talent in North America, he says, that would be required for programmes equivalent to those of the B.B.C. would be \$2,000,000. "It is because the half million Canadian radio fans have access to \$20,000,000 of entertainment that the Canadian radio business has been fairly prosperous in a period of general financial depression."

Synthetic Air

Better Than Natural Air, According To Scientists

Science believes it can give mankind synthetic air to breathe that is better than the natural atmosphere, the American Chemical Society was told.

Professor J. W. Hershey, McPherson College, McPherson, Kas., said experiments have shown that life can be sustained more healthfully with a chemically concocted atmosphere, which can be manufactured and introduced in office buildings, airplanes and submarines, than with the nitrogen-oxygen that surrounds the world.

Experiments with white mice showed that in some cases they lived more healthfully in helium-oxygen than in nitrogen-oxygen, Professor Hershey said.

A strangely mottled discolorization which attacks otherwise healthy teeth of children in certain parts of the country, notably Texas, is due to the chemical element fluorine, according to R. V. Churchill, who described his investigations before the convention.

The fluorine discolorization, which apparently does not cause tooth decay but is located under the enamel, comes from the fluorine element sometimes present in drinking water, Churchill said.

Dream May Be Realized

Dr. Hugo Eckener, Zeppelin commander, bade America goodbye seeing realization of his dream of scheduled trans-Atlantic airship flights by 1933. In ten years, Dr. Eckener believes, two sailings a week in either direction will be made.

Alberta Honey Producers

The honey producers in Southern Alberta are now shipping honey to British Columbia coast points in car-load lots.

South Africa's record gold production in 1930 is continuing this year.

Japan is launching several irrigation projects.

Granny Rides a Motorcycle

Sixty-Year-Old English Woman Is Quite An Enthusiast

In the face of the displeasure of her grandchildren, Mrs. Clara Brown, aged 60, recently rode from Leamington to London on her motorcycle to attend the annual dinner of the London Ladies' Motor Club, in honor of Sir Malcolm and Lady Campbell and other racing drivers. She rode in overalls and waders, with her dinner gown strapped on the handle bars. Three years ago Mrs. Brown took part in a six-day motor trial and recently won a Concours d'Elegance, wearing a riding outfit which she made herself.

Apples In Egypt

Canadian Apples Are Being Well Received In The Cairo Market
The market for Canadian products, particularly apples, is ever widening. Recent reports indicate that a potential market of considerable interest to Canadian growers is available in Egypt. Canadian apples are being well received in the Cairo market, selling at around \$4.88 1/2 per box. They have not only won recognition as the best apples coming onto the Egyptian Market, but apparently they can be laid down there at a price which makes them more attractive than other fancy pack importations from the United States.—Dominion Department of Agriculture.

On Threshold Of Discovery

Dr. John Anderson, formerly of the London school of tropical medicine, died at Shanghai, China, after an operation, just when he believed himself to be on the threshold of a crowning achievement in his research into cerebro spinal meningitis. It is understood he succeeded a short time before in isolating the meningitis germ.

Regular air service between Europe and Australia is being considered.

Test Soil Before Working

If Dug When Wet It Bakes Later On

Before being tempted to go into the garden and dig, make a simple test of the soil. If it is right for working it will crumble when squeezed lightly in the hand. If it compacts into a ball, or if it really muddies one's go fishing or read a book until it dries boots it is too damp and by all means out a little more. Too early working will cause even light garden soil to bake later on.

Last year Great Britain imported 81,200,000 eggs from France.

- A SIR SAMUEL CUNARD, Founder of the Cunard Line.
- B SIR PERCY E. BATES, Bart., G.B.E., Chairman of the Cunard Line.
- C R. W. REFORD, Esq., Canadian Director of the Cunard Line.

- 1 Canadian Bank of Commerce Building, Toronto, Ont., 475 feet high.
- 2 Sun Life Assurance of Canada Building, Montreal, 400 feet high.
- 3 The Royal Bank of Canada Building, Montreal, 393 feet high.
- 4 The NEW CUNARD STEAMSHIP, now under construction, 1,013 feet long.

The above photograph gives some idea of the immense size of the new Cunard liner at present under construction. If the liner were placed on its end the bow of the ship would be more than five hundred feet higher than the top of the highest building in the British Empire.

Also pictured above is Sir Samuel Cunard, born in Halifax, N.S., who founded the Cunard Line in 1839. The present chairman of the Line is Sir Percy Bates, Bart., G.B.E., while R. W. Reford, of Montreal, is Canadian resident director of the company.
